

Rapid efficient picking with CARTONFLO

- 1 Cartons flow to rack on conveyor from production or from reserve storage.
- 2 Replenishment of rack is rapid.
- 3 Inventory is protected from dirt and damage. High cube storage saves space, adds neatness and order to the warehouse. Shortages are easy to spot.
- 4 Picker works rapidly with less effort. Items are easy to identify and find. Very little walking. No distractions.
- 5 Picked items are placed effortlessly on conveyor and move immediately to a waiting truck or consolidation area.

A few of the problems CARTONFLO eliminates

- 6 Hazardous and time wasting cross traffic when stock replenishing fork trucks interfere with stock pickers.
- 7 Stock pickers walk great distances to cover full product line.
- 8 Distractions and interruptions of work.
- 9 Extravagant use of floor space.
- 10 Excessive manual handling.
