

# Service to the Fleet

A record of responsive participation in the U.S. Navy's research and development programs.

*Underway replenishment of  
the USS Ranger (CVA-61)*

The rapid development of the U.S. Navy's Underway Replenishment Program was assisted to a major degree by concepts, developments and services supplied by the Kornylak Corporation.

"Service to the fleet" has been an enjoyable experience.

The record of successful accomplishment has been archived in concert with personnel throughout the entire U.S. Navy system.

We look forward to further challenges and opportunities to participate in the Navy's programs.
